DETAILED ACTION

Drawings

1. The corrected or substitute drawings were received on 7-21-03. These drawings are approved by the Examiner.

Election/Restrictions

2. Claims 5-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9 (referring to oral election in paper no. 8).

Specification

3. The amendment filed 7-21-03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The term "contained in" as it appears in claims in claims 1, 2, and 4. There is no support for an internal CCA particle and the inference of such as added to the claims is new matter.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1756

5. Claims 1-4, 11, and 12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support for a CCA particle "contained in" a mother particle. The entire specification is drawn to external CCA where the particles are adhered or attached to a mother particle.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-4, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oshiba (US 2002/0110746). Oshiba teaches a similar toner where the relationship between a CCA (paragraph 16 line 2) contained in a toner is expressed as a ratio (paragraphs 17-26) obtained through particle analysis. Although Oshiba teaches the ratio as an isolation ratio of CCA particles, it would have been obvious to one of ordinary skill in the art to use the teachings of Oshiba to arrive at a similar statistical analysis that relates to CCA particles expressed through inclination of a straight line of CCA particles and particle size of toner because the same desired effect of a small amount of free CCA particles to interfere with the electrical characteristics

(paragraph 19, table 2) of the toner can be obtained by routine experimentation to arrive at a statistical analysis of CCA particles of the present invention.

Response to Arguments

8. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
